General disclaimer: In this section a broad and comprehensive summary of the comments is provided. It is not intended to include every specific aspect or stated position by each contributor. If the reader is interested in specific aspects of any of the summarized comments or the full context, she or he is advised

to read the specific contributions, which can be found through the link referenced above (View comments submitted)

The ALAC is of the view that the implementation of policies that support the Universal Acceptance of IDN's is crucial for the success and uptake of IDN TLD's. It therefore supports the recommendations of the JIG

ICANN is urged to leverage and use its influence and resources to promote and support the Universal Acceptance of IDN TLD's as well as consistent, predicatable and secure user experience.

Section IV: Analysis of Comments
