

To the members of the Board of ICANN:

We are herewith stating our support for the "Expression of Interest" programme, as proposed by ICANN.

"Contemporism" is a company situated in Germany. We support companies like Bayern Connect that want to apply for a .bayern top level domain. We believe new top level domains are a necessary step to provide more choice and benefits to internet users.

The EOI will provide ICANN with the necessary information to solve unresolved issues that are currently hindering the advancement of the application process. We therefore view the EOI as a step forward in creating a namespace for Bavarians in the Internet and therefore urge ICANN to proceed with it.

Sincerely,

Nikolas Frhr. v. Cramer-Klett
