Accomplishments this period

DSSA

Reviewed and refined the new approach to threat-events and evaluation scale
Noted that threat-events are always a significant event for registrants and users **within that zone**, but that impact on the whole internet varies with the number of users of the zone
Focused our analysis on worst-case scenarios

DSSA Ops Group

Finalized new threat-event evaluation scales ("type", "range" and "severity") in anticipation of Thursday call
Focused on 3 threat-events - zone doesn't resolve, is incorrect or is compromised
Revised NIST tables and Costa Rica update deck based on discussion during the week

Plans for next period

DSSA

Confirm revised threat-events and evaluation
Review schedule

DSSA Ops group

Review Costa Rica update draft

Review CR schedule
Review CR meeting plan

Issues and concerns

None
