Review of IDN ccTLD Fast Track Process: Request for extension to public comment period

9 December 2010

The ccNSO welcomes the opportunity to comment on the one-year review of the IDN ccTLD Fast Track process.

ccNSO members discussed the review at their meeting in Cartagena, Columbia and participated in the dedicated public session which facilitated broader community communication on the issue.

Given the recentness of these deliberations, and in light of its significant interest and involvement in the fast track process, the ccNSO requests an extension to the public comment period, beyond the current deadline of 17 December 2010.

An appropriate extension, taking into account the upcoming festive season, will allow the ccNSO to finalise a comprehensive, considered response.

Chris Disspain
Chair – ccNSO Council
