

Survey of Internationalized Registration Data Handling Practices by TLD Registries

Respondent Contact Information

Page description:

As part of the process to implement the internationalized registration data recommendations of the ICANN WHOIS review team, ICANN is surveying existing internationalized registration data handling practices by TLD registries. You are being asked to complete this survey because you have been identified as a respondent for a TLD registry operator. Thanks, ICANN

1. Please fill your contact info: *

Name:

Organization:

E-mail:

2. Please list the TLDs to which the following answers will apply. *

If your organization is responsible for multiple TLDs to which different sets of answers apply, please fill this survey multiple times, as necessary.

Submission

Page description:

3. Does the registry support EPP? *

- Yes
- No

4. Does the registry support methods other than EPP for registration data submission? *

- Yes
- No

5. In what language/script is registration data submission allowed? *

If you list specific language(s)/script(s), language and script must be paired and each part of the pair is required. A language may be written in multiple scripts (e.g. romanized vs. local script form).

- Any language/script
- Specific language(s)/script(s):

6. Does the registry support submission of registration data in multiple languages/scripts simultaneously? *

- No, only a single language/script is allowed.
- Yes. (Which ones?) *

7. Is registration data collected with additional language/script tags? *

- Yes
- No

If yes, is such info stored at the level of each element or complete registration record?

8. Is there a mandatory language/script for registration data submission? *

No, any language/script will be accepted.

Yes. (Which one and why?)

 *

9. Is Romanization required for registration data? *

No

Yes. (Why?)

 *

EPP (details)

Page description:

These questions relate to EPP support for submission of registration data by registrars.

10. Level of support for <postallInfo type="loc"> : *

Required

Allowed

Disallowed

11. Level of support for <postalInfo type="int"> :*

- Required
- Allowed
- Disallowed

12. Please describe any non-standard extensions for registration data submission that the registry has defined:

13. Do those extensions support internationalized data? (please describe how)

Non-EPP submission

Page description:

14. Please list the methods other than EPP that the registry support for registration data submission:

15. Please describe how each method handles international registration data:

Translation and Transliteration

Page description:

16. Does the registry transliterate submitted registration data into a different script? *

- Yes
- No

If yes, please describe the process. Are there problems or difficulties with the process? Why is this process necessary?

17. Does the registry translate submitted registration data into a different language? *

- Yes
- No

If yes, please describe the process. Are there problems or difficulties with the process? Why is this process necessary?

18. Please describe any other alteration of registration data between the submission and the display:

19. If you do transliteration/translation, what standards and tools do you use?

20. If you do translation/transliteration, which data elements are transliterated/translated?

21. If you do translation/transliteration, how is local language data accuracy and consistency maintained (if any)? Is this policy different from that of Latin data collected?

Display

Page description:

22. In what language/script is registration data displayed?

All languages/scripts we find in the database.

Specific language(s)/script(s): *

Why? *

23. Is internationalized data displayed over the WHOIS protocol? *

Yes

No

If yes, is there any special “marking” of internationalized data? (please describe)

24. If display of registration data is done over the web, are all languages/scripts in the registration data displayed at the same time or does it depend on the user's language settings, or something else? (please describe)

25. Approximately what percent of registrants submit data is in local language? *

Comments

Thank You!

Thank you for taking our survey. Your response is very important to us.
