Survey of Internationalized Registration Data Handling Practices by TLD Registrars

Page One

Page description:
As part of the process to implement the internationalized registration data recommendations of the ICANN WHOIS review team, ICANN is surveying existing internationalized registration data handling practices by TLD registrars. You are receiving this survey because you have been identified as a respondant for a TLD registrar. Thanks, ICANN

1. Please fill your contact info:

Name:

Organization:

Email:

2. Please list the TLDs to which the following answers will apply.
   If your organization is responsible for multiple TLDs to which different sets of answers apply, please fill this survey multiple times, as necessary.

Registrant Input

Page description:

3. Is the registrant allowed to submit registration data in any language/script? *

    ○ Yes, any language/script is allowed.

    ○ No, specific language(s)/script(s) allowed: [_____]

4. Is the registrant allowed to submit registration data in multiple languages/scripts simultaneously? *

    ○ Yes

    ○ No, only a single set of registration data in a single language/script is supported.

5. What percent of registrants enter data in a local language? *

[_____]

Comments

[_____]

6. Does the registrar take translation/transliteration in Latin script directly from the registrant, in case data is entered in local script? *

    ○ Yes

    ○ No

If yes, how do you handle cases where the registrant is unfamiliar with Latin script?

[   ]

7. Is Romanization is required for registration data? *

○ Yes

○ No

8. Is the registrar's registration interface accessible in multiple languages? *

○ Yes

○ No

If yes, does the interface language affect the set of registration data elements input by the user? (please describe)

○ Yes

○ No

Comments

[   ]

Does the interface language affect the allowed/supported set of languages/scripts used for registration data? (please describe)

○ Yes

○ No

Comments

[ ]

Registrar Processing

Page description:

9. Does the registrar transliterate submitted registration data into a different script? *
   If yes, please describe the process. What is the reason for implementing this process? Are there problems or difficulties with the process? (technical, legal, etc.)

   ○ Yes

   ○ No

   Comments

   [ ]

10. Does the registrar translate submitted registration data into a different script? *
If yes, please describe the process. What is the reason for implementing this process? Are there problems or difficulties with the process? (technical, legal, etc.)

○ Yes

○ No

Comments

[   ]

11. Is there any other alteration of registration data between input by the registrant and submission to the registry? *
If yes, please describe the process. What is the reason for implementing this process? Are there problems or difficulties with the process? (technical, legal, etc.)

○ Yes

○ No

Comments

[   ]

12. If you do transliteration/translation, which standards and tools are used?

[   ]

13. If you do translation/transliteration, how is local language data accuracy and consistency maintained (if any)? Is this policy different from that of Latin data collected?

Submission to Registries

Page description:

14. Does the registrar support submitting internationalized registration data to registries? If yes, please list registries.

   ○ Yes

   ○ No

Comments

15. Does the registrar support submitting registration data in multiple languages/scripts to registries?
   If yes, please list registries.

   ○ Yes

   ○ No

   Comments
