

??? - others registrars registries registrants data consumers notes

ongoing costs

compare to .COM transition from RRP to EPP  
this one - smaller, faster, simpler -- cheaper

after transition

similar to "starting to escrow" project - a bit of a startup cost followed by a small ongoing

escrow costs  
port 43 costs  
web-Whois costs  
access costs  
??? Others

no change  
eliminated  
negligible

no change?  
incr. higher  
negligible

lower/small lower/small

whois server costs are a small fraction of web-server costs

transition costs

develop transition system  
specification  
design  
build  
test

less than next TLD less than next TLD

similar to transition  
similar to a "start from RPP to EPP, but  
up escrow" project much easier/cheaper

convert/move data  
transition planning/training  
convert data  
send/receive data  
review/approve data

costs scale w/#  
no training  
no conversion  
costs scale w/#  
costs scale w/#

costs scale w/#  
no training  
no conversion
