RE: Employ Media sTLD Charter Amendment

Dear Chairman Dengate Thrush and Members of the Board:

I am writing on behalf of Internet Brands, Inc, to urge you to reject Employ Media's request for authority to permit second level registration of strings that do not correspond to an employer's name in the .jobs sponsored top level domain. As the owner of several niche job boards such as Hospitaljobsonline.com, Nursingjobs.org, Aviationemployment.com, ClassAdDrivers.com and Groovejob.com, we would be directly and adversely affected by the unilateral expansion of the .jobs charter to encompass regional and industry-specific second-level registrations. In no uncertain terms, we are opposed to the proposed expansion of the .jobs charter.

Under the terms of ICANN's request for proposals for new sTLDs dated 15 December 2003 (the "sTLD RFP"), applicants – including Employ Media - were required to demonstrate that the proposed sTLD addresses the needs and interests of a clearly defined community (the Sponsored TLD Community). In addition, applicants were required to demonstrate that the policy-formulation procedures for the sTLD operate primarily in the interests of the Sponsored TLD Community, and that the proposed sTLD enjoys broad based support of the Sponsored TLD Community.¹

In its application, Employ Media proposed to serve the needs of human resources professionals responsible for human resources management in the corporate setting, and pledged to maintain .jobs as "a name space for employers."² It also promised to limit registrations to the legal name of an employer and/or a name or abbreviation by which the employer is commonly known and to prohibit registration of occupational and industry, and geographic identifiers.³ Employ Media's

current request for to permit the “registration, use, and promotions of domains that are not the company names of the registrant”⁴ would fundamentally alter the Sponsored Community for the .jobs sTLD and eliminate its pledge not to create second level registrations of regional and industry-specific job boards.

Employ Media does not have the support of online employment service providers such as Internet Brands, Inc. to add second level registrations that will be confusingly similar to established job boards. ICANN should not permit sTLD operators to “route around” the sponsorship eligibility requirements in the sTLD RFP and the protections built into the .jobs Registry Agreement to prevent “abusive registration activities and other activities that affect the legal rights of others.”⁵ Approval would undermine the credibility of ICANN’s commitments in connection with the introduction of new top level domains in general, and “community based” TLDs in particular.

Sincerely,

A handwritten signature in blue ink, appearing to read "Steve Gilison". The signature is written in a cursive, flowing style.
