Topic: GNSO-Approved RAA Amendments

Please accept the following comments in response to ICANN's call for public feedback on the GNSO-Approved RAA Amendments.¹ The RAA is the principal agreement governing ICANN-accredited registrars, and we support these amendments to update this important agreement.

We would like to acknowledge the time, effort, and spirit of cooperation on behalf of all the GNSO constituencies that went in to the development of these amendments.

Additionally, we suggest to the Board that it consider offering financial incentives for early renewal. Doing so will encourage those registrars who recently renewed their accreditation to accept the new RAA as soon as possible, rather than await the expiration of their current term.

Finally, we urge the Board to accept all proposed amendments as a group, to ensure that various dependencies and points of compromise are preserved.

Sincerely,
GoDaddy.com, Inc.
