

Update on the Work of the Internationalized Registration Data Working Group

*Singapore
June 2011*

Agenda

1. Introduction
2. Background & Current Status
3. Update on Activities
4. Final Report Outline
5. Next Steps

Introduction

- Internationalized domain name (IDN) guidelines exist for domain labels and names.
- No standards exist for submission and display of domain registration data in directory services.

Internationalized Registration Data Working Group (IRD-WG)

- Chairpersons
 - Edmon Chung (GNSO)
 - Jim Galvin (SSAC)

–List of members see: <https://community.icann.org/display/gnsossac/4.+Members>

Purpose:

Joint Working Group of the Generic Names Supporting Organization (GNSO) and the Security and Stability Advisory Committee (SSAC) to study the feasibility and suitability of introducing submission and display specifications to deal with the internationalization of Registration Data.

Background and Current Status

- **2009:** Internationalized Registration Data Working Group (IRD-WG) established by ICANN Board.
- **2009-2010:** Study feasibility and suitability of introducing submission and display specifications for the internationalization of registration data.
- **Nov 2010:** Published Interim Report: <http://gns0.icann.org/issues/ird/ird-wg-final-report-15nov10-en.pdf>.
- **Nov 2010-Present:** Analyze comments on Interim Report; begin producing Final Report.

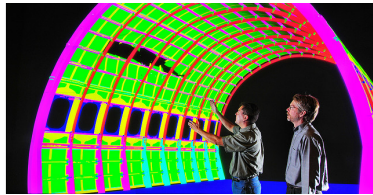

Update on Activities

- Analyzed comments received in the Public Forum on the Interim Report.
- Begin drafting outline of Final Report.

Next Steps

- Complete Final Report and publish in Public Forum.
- Analyze comments from Public Forum and revise as necessary.
- Send Final Report to GNSO and SSAC for review and approval.
- Publish Final Report as approved (Fall 2011).

Thank You
