Internet Society of China Comments on the WHOIS Review Team Final Report(Draft)

Internet Society of China thanks WHOIS Review Working Group for the comments chance of the ICANN WHOIS policy review, believing that ICANN WHOIS policy review is appropriate and necessary.

The problems listed in the ICANN WHOIS policy report are existed, which need to cause the Internet stakeholders especially ICANN Council and its staff to pay attention. Internet society of China pays close attention to the WHOIS work in progress, at the same time, put forward the following points:

Internet Society of China wishes ICANN to strengthen information protection of various countries and regions and communication of Internet management laws and regulations. Thus, Internet Society of China proposes a local collaboration mechanism led by local Internet industry authorities，which should involves the local registries and registrars in discussing issues related to the local compliance of WHOIS policy.

Internet Society of China wish ICANN to strengthen law applicability of WHOIS policy, which means ICANN WHOIS

policies should respect national laws and policy regulations in different countries. Therefore, we suggest that ICANN should keep the requirement of accurate and complete WHOIS data, at the same time, to grant access to part WHOIS data flexibility according to local law.

On the accuracy of the data, We should emphasis on the importance of the data accuracy, meanwhile, the Internet Society of China recommend ICANN to build of third-party audit mechanism, submitted audit results to the ICANN annually. In this way, we can improve the accuracy of WHOIS data. If the data errors appear, this situation can be treated in time.

Internet Society of China wishes WHOIS to build perfect WHOIS information complaint handling mechanism. After ICANN accept of the community on the WHOIS untrue information inaccurate reports, often can not be treated in time, no feedback information. Internet Society of China hopes ICANN to establish full-time team for processing and tracking.

Internet Society of China wishes WHOIS to Increase WHOIS policies propaganda. Internet Society of China suggested that ICANN and the registry work jointly to promote the progress of the work domain, and improve user confidence in the work of ICANN.

Internet Society of China wishes WHOIS to establish the universal WHOIS web interface to facilitate the use of the domain name regulatory authorities and the domain name registrant.
