

Please see as follow with Amendment Proposal to Draft Applicant Guidebook on New gTLD Program (Version 2) by Internet Society of China.

A. Propose ICANN to add one requirement in the evaluation process in applying for multilingual character string, i.e. to evaluate whether the string be supported or objected by the counties with the most users owning or using this language or character.

B. Propose ICANN to select expert representing the corresponding language community as the member of dispute resolution proceeding to evaluate the application for multilingual character string.

C. As government being a main body to raise objection in Morality and Public Order proceedings, propose to execute veto power, set up black list mechanism as well as charge no fee in relevant process. i.e. when certain string be objected by government in Morality and Public Order proceedings, ICANN should no longer evaluate this string and put it into the blacklist, prohibiting further application by other institutions or communities.

D. Propose to cancel the restriction that gTLDs should not use two characters.

Internet Society of China

09.04.17

1. 建议 ICANN 在多语种字符串申请审核条件中增加一条，即该字符串是否得到了拥有该语言、文字用户最多的国家支持或者反对。
2. 建议 ICANN 选择争议处理专家小组成员时，针对多语种顶级域名的申请须有来自相应语种社群的专家代表。
3. 建议对于政府作为提出道德和公共秩序异议的主体时，实行“一票否决”，并建立黑名单制度，同时免收相关费用，即若政府基于道德和公共秩序对某个字符串提出异议，ICANN 应拒绝对该字符串申请继续审议，并将该字符串列入黑名单，禁止其他机构或社群申请。
4. 建议取消在顶级域名中不能使用两个字符的限制。
