ICANN,

I commend the board on it's responsiveness. Now that you have taken a truly significant step towards new gTLDs, I am writing to urge you to stay the course with the EOI process.

Most importantly, we believe that you should set a date for this summer to begin accepting EOI applications. We fear that if you do not continue to drive this proposed program forward that it may face the same fate as the new gtld application window.

EOIs are smart and are risk free so please keep the process driving forward by setting a date for this summer. Thank you for your leadership and hard work.

Regards,

Laura A. Wasser
