RE: Opposition to Employ Media Request to Change sTLD Charter

Dear Chairman Dengate Thrush and Members of the Board:

I am the President and Co-Founder Internet Employment Linkage, Inc. d/b/a HigherEdJobs ("HigherEdJobs"). HigherEdJobs owns the rights to the HIGHEREDJOBS trade name and service mark, including the following United States trademark registrations and applications for registration ("HIGHEREDJOBS Family of Marks"): HIGHEREDJOBS.COM, Registration No. 2,688,003, registered February 18, 2003; HIGHEREDJOBS.COM (stylized), Registration No. 2,781,127, registered November 11, 2003; HIGHEREDJOBS (stylized), US. App. Ser. No. 77/950,871, filed March 4, 2010; and HIGHEREDJOBS, US. App. Ser. No. 77/950,843, filed March 4, 2010. On May 26, 2010, we submitted a comment (a copy of the letter and comment is attached) and asked SHRM whether they would respect trademark rights. John Jeffrey, ICANN's general counsel, was copied on this letter. As of today, we have yet to receive a response from either SHRM or ICANN.

HigherEdJobs is the leading source for jobs and career information in academia. During 2009, more than 2,600 colleges and universities posted over 55,000 faculty, administrative and executive job postings to the company's website. HigherEdJobs is visited over two million times each month by 700,000 unique visitors. HigherEdJobs.com, which began operating in 1996, has been named a Top 100 Job Board by WEDDLE's, the world's largest publisher of print guides to job boards and referred to as the "Zagat" of the online employment industry by the American Staffing Association.

We urge you to reject Employ Media's request for authority to permit second level registration of strings that do not correspond to an employer's name in the .jobs sponsored top level domain. HigherEdJobs.com, which would be directly and adversely affected, opposes the unilateral expansion of the .jobs charter to encompass regional and industry-specific second-level registrations.

Under the terms of ICANN's request for proposals for new sTLDs dated 15 December 2003 (the "sTLD RFP"), applicants – including Employ Media - were required to demonstrate that the proposed sTLD addresses the needs and interests of a clearly defined community (the Sponsored TLD Community). In addition, applicants were required to demonstrate that the policy-formulation procedures for the sTLD operate primarily in the interests of the Sponsored TLD Community, and that the proposed sTLD enjoys

broad based support of the Sponsored TLD Community.¹ In its application, Employ Media proposed to serve the needs of human resources professionals responsible for human resources management in the corporate setting, and pledged to maintain .jobs as “a name space for employers.”² The limited nature of the .jobs Sponsored Community is reflected by the applicant’s commitment to limit registrations to the legal name of an employer and/or a name or abbreviation by which the employer is commonly known. According to the sTLD Application, “due to restrictions set forth in this proposal, *a registration in the .jobs sTLD will be associated with an employer,*”³ and Employ Media committed to prohibit registration of occupational and industry, and geographic identifiers.”⁴ The bottom line is that as proposed by Employ Media and approved by ICANN, the .jobs sTLD is intended to serve HR professionals and recruiting firms representing *direct employers only, in each case by using the legal name of such employers as a registration at the second level.* That community does not include online employment services providers like HigherEdJobs.com, nor did Employ Media demonstrate the support of online employment services providers in connection with the .jobs sTLD Application.

Employ Media’s current request for authority to permit the “registration, use, and promotions of domains that are not the company names of the registrant”⁵ would fundamentally alter the Sponsored Community for the .jobs sTLD and eliminate its pledge not to create second level registrations of regional and industry-specific job boards. Employ Media did not attempt to demonstrate the support of online employment services providers and their vendors, and in fact went out of its way to avoid contacting job board operators about the proposed expansion.⁶ This is not surprising, given that Employ Media intends to add second level registrations that will be confusingly similar to established job boards and, in the case of HigherEdJobs.com and others, intentionally infringe on federal trademark rights.

As a material change to the .jobs Registry Agreement, this request must be reviewed by the ICANN Board based on applicable criteria from the sTLD RFP. Under those criteria, the request should be rejected as an attempt to “route around” the sponsorship eligibility requirements in the sTLD RFP and the protections built into the .jobs Registry Agreement to prevent “abusive registration activities and other activities that affect the legal rights of others.”⁷ Approval of the .jobs Phased Allocation Program would threaten the integrity of the RSEP process and undermine the credibility of ICANN’s commitments in connection with the introduction of new top level domains in general

Sincerely,

John P. Ikenberry
President and Co-Founder
